About me

I consider myself a proactive, dedicated, and motivated person, always looking for new challenges to help me grow professionally. In software development, I found something that keeps me motivated to solve problems and that offers me the possibility to continue learning and developing my skills.

Skills & Competencies

- Android development
 - Android SDK
 - Java/Kotlin
 - Jetpack Compose
 - UX/UI design
 - Dependency Injection (Dagger-Hilt/Koin)
 - RESTful APIs integration (Retrofit/KTOR)
 - Database management (Room)
- Low Code development
 - PEGA
- Incident Management
 - ServiceNow
- Atlassian Tools
 - Jira
 - Confluence
- Agile/Scrum methodologies
- Continuous Integration/Continuous Development (CI/CD)

Soft Skills

- Problem-solving
- Proactivity
- Communication
- Teamwork
- Project management

Languages

- Portuguese- Native speaker
- English

Work Experience

Junior Android Developer @ SurfRec

August 2022 - June 2024

- Responsible for the design and development of a new Android application for SurfRec
- Researched and implemented new technologies to enhance the application
- Integrated APIs and web services
- Cooperated with a UX/UI team
- Developed and maintained documentation
- Designed, implemented and maintained the entire backend infrastructure. This included multiple servers built with Spring/Kotlin and PostgreSQL, a physical camera and another Android application to interact with all servers. Every component communicated through Sockets in a private network

PEGA Developer @ Siemens

November 2022 - Now

- Worked in NextGenP2P
- Developed and maintained code for the application
- Cooperated with a UX/UI team
- Did incident management and resolution for the application

Education

Degree in Software Engineering

Instituto Superior de Engenharia de Lisboa (2019-2022).

Average: 15/20
